ЗАВДАННІ

3. Write a short essay: "My favorite kind of traveling"

My favorite kind of travelling is by foot like hiking. This kind of travelling is the best to my mind. I think so because I like explore nature, I mean, what surrounds us. I like all survival things like multitools, watches (I really used to interest in it), backpack (I a lot of quality and reliable brands of backpacks) and so on. Since childhood, I like to join on some trips and trips, I would always love to look at something closer, longer. Well, for example you came to another country and you need to cover a distance of 4 km. You get in a car and drive-in your way you see mountains, some rivers, lakes, possibly bridges (if it's quite a picturesque country), but if you're still a non-standard person, you will want to walk to see the city, see other people, come closer and take a look at the buildings etc. but sitting in a car you can't do something.
