

р. 30 ex. II, IV (in writing)

II

Create new technologies, the field of electronics, cell phones, play a major role, understand complex processes, direct proof, a difficult task, on the other hand, reduce power consumption, achieve low collector resistance, on the same chip.

IV

1. switching, phone, circuits
2. versatile, previously
3. liquid crystal
4. wireless communication
5. a breakthrough, Adding, new generation
6. heavily doped region
7. consume
8. benefits, bipolar transistor
9. adding, low collector resistance

Describe your job. (in writing)

I work for a IT company based in Kyiv, which makes different software programmes for MAC OS. Most of my time is spent experimenting with icons, some design features and sometimes fix different issues. It's creative work because I have to do many different things every day, so I never get bored.
